Good News For Homemakers

FROM ECONOMICS

Each week the homemaker sees something else that needs special attention in the home. The following suggestions are to help you.

DISHWASHER

Do you have dishwasher film inside your dishwasher? If so, fill the dishwaher with all your dirty dishes. However, never put any silver, aluminum or brass in the washer when this method is used or you will have a mess. Put a bowl in the bottom of the dishwasher. Pour one cup of household bleach into the bowl. Run through the washing cycle but do not dry. This is very important to follow this instruction. Fill the bowl again with one cup white vinegar and let the dishwasher go through the entire cycle. This will remove all the film, not only from your glasses but from the inside of the dishwasher.

THE DISHWASHER.

DRAIN

1. When a drain is clogged with grease, pour a cup of salt and a cup of baking soda into the drain, followed by a pan of boiling water. The grease usually will dissolve immediately and open the drain.

2. Coffee grounds are an absolute no-no. People have been telling for years that these are great for cleaning the drain. They do a nice job of clogging, especially when they get mixed with grease and other gunk.

GARBAGE DISPOSAL

Grind a half lemon, lime or orange rind in the disposal to remove any unpleasant odor. Grapefruit rind works almost as well.

GLASSWARE

1. Never put a delicate glass in hot water, bottom side first. It will crack from sudden expansion. The most delicate glassware will be safe it if is slipped inside edgewise.

2. Vinegar is a must when washing fine crystal. Rinse in one part vinegar to three parts water. Air dry.

3. When one glass is stuck inside the other, do not force apart. Fill the top glass with cold water and place the lower one in hot water. They will come apart without breaking.

4. A small nick in the rim of a glass can be smoothed out by using an emery board. Be careful -- don't try this on crystal.

5. Scratches on glassware will disappear if polished with toothpaste.

GRATER

1. For a fast simple clean-up, rub salad oil on the grater before using.

2. Use a toothburuh to brush lemon rind, cheese, onion or whatever out of the grater before washing it.

MEAT GRINDER

Before washing, run a piece of bread through it. This will save you a lot of effort and cleaning.

OVEN

1. Following a spill, sprinkle with salt immediately. When the oven is cool, brush off the burnt food and wipe with a damp sponge. The salt will help stop the smoking, particularly it if is a sugary spill like from a crust pie.

2. Sprinkle bottom of oven with automatic dishwasher soap and cover with wet towels. Let stand for a few hours.

3. A quick way to clean over parts is to place a bath towel in the bathtub and pile all removable parts from the oven onto the bath towel. Draw enough hot water to just cover the parts and sprinkle a cup of dishwasher soap over it. While you are cleaning the inside of your oven, the rest will be cleaning itself.

4. An inexpensive oven cleaner is as follows: Set oven on warm for about 20 minutes and then turn off. Place a small dish of full strength ammonia on the top shelf. Put a large pan of boiling water on the bottom shelf and let it set overnight. In the morning, open the oven and let it air a while before washing off with soap and water. Even the hard baked-on grease will wash off easily.

PLASTIC CUPS, DISHES AND CONTAINERS

1. Coffee or tea stains can be scoured out of plastic cups; dishes and containers with baking soda.

2. Or you can fill the stained cup with hot water and drop a few denture cleanser tablets. Let soak for an hour.

2.To rid foul odors from plastic containers, place crumpled up newspaper, black and white paper only, into the container. Cover tightly and leave overnight.
